

MAJENGBASAN GLORY

Osun State, Nigeria | 0705-406-4966 | majengbasanglory@gmail.com | LinkedIn: www.linkedin.com/in/ibukunoluwamaj

PROFESSIONAL SUMMARY

Technical customer support professional with experience in CRM-based issue resolution, structured escalation, and remote operational workflows. Combines user-facing communication skills with a Computer Engineering foundation and first-hand experience using crypto wallets and executing on-chain transactions. Comfortable investigating issues across digital systems, documenting findings with precision, and acting as the bridge between users and internal teams during incidents. Fluent English communicator available for flexible hours across LATAM and North America time zones.

CORE SKILLS

Support & Triage: Technical Issue Investigation | Structured Escalation | User Impact Assessment | Ticket Management
Systems: CRM Tools (HubSpot) | Log & Dashboard Awareness | API Basics | Client-API-Backend Architecture
Crypto/Fintech: Crypto Wallet Usage (personal) | On-chain Transactions | Wallet Functionality | Transaction Troubleshooting
Ops & Monitoring: Anomaly Identification | Incident Documentation | Runbook Maintenance | Process Improvement
Collaboration: Cross-functional Communication | Trello | Zapier | Google Workspace | Async-first Workflows

PROFESSIONAL EXPERIENCE

Customer Support & Administrative Assistant (Remote) : Express Tech Academy *Oct 2025 – Dec 2025*

- Managed inbound client issue queue via email and HubSpot CRM, triaging requests by urgency, routing complex cases to senior team members with full context, and tracking resolution through to close.
 - Documented client interactions, issue histories, and resolution steps in structured CRM records — maintaining the audit trail needed for pattern analysis and recurring issue identification.
 - Identified workflow bottlenecks and implemented Zapier automations to eliminate manual handoff steps between tools, reducing response turnaround and improving operational consistency.
 - Escalated unresolved issues with clear reproduction context, impact scope, and supporting documentation — enabling faster resolution by the internal team without back-and-forth.
 - Maintained internal process documentation and updated team workflows as procedures evolved, keeping the knowledge base current and reducing onboarding time for new team members.
 - Coordinated across remote team members via Trello and async communication to ensure no open issues aged beyond agreed SLAs during off-hours coverage windows.
-

ADDITIONAL EXPERIENCE

Data Analyst Intern (Remote) — Lagos State Agency for Education *2023 – 2025*

- Monitored live Power BI dashboards for operational anomalies, identifying and escalating data discrepancies before they affected downstream reporting — directly analogous to system monitoring in a support operations role.
 - Maintained configuration and parameter tables underpinning team-wide data workflows, ensuring system integrity and consistent outputs across reporting cycles.
 - Built Python-automated ETL pipelines, developing practical understanding of how data flows between systems — useful context for troubleshooting client-API-backend issues.
-

EDUCATION

B.Sc. Computer Engineering — Redeemer's University, Osun State *2026*

Relevant coursework: Database Systems, Software Engineering, Data Analysis, Professional Communication
